# Apartment Management

Login

I create a login page that check if the user is admin or not. If role is admin it redirects to another page. Check password with md5 method to be safer. It starts a session. Other pages control if logged in or not. If user not login, it redirects user to login page.

Announcements

If user login as admin he sees add and delete buttons that can add new announcements and delete them. When u try to add new announcement, a form will show up and user will fill empty spaces for announcement.There are date for announcements. And latest announcement will top of table.

Economy

User login as admin. In this tab admin can show expense or income on a table. Admin can add new income or expense by clicking add button. There will be a form that asks is it income or expense, where money get by or used for and how much money is it. When there is too much information, he can delete too but it's not suggested.

Add

Income/Expense	Get by/Used for	Amount	
Income	Dues	500 ₺	Delete

Expense	insulation	1500 ₺	Delete

Dues

User login as admin. Admin can see who has due to pay, who paid due and when they did it last time. When admin get payment, admin can edit it by clicking payment button. A form will show up and ask when resident paid and how much money paid. When admin submit this form debt will decrease by payment amount. When admin click add button everyone's debt will increase by dues amount.

Resident List

User login as admin. Admin can see all user's some information. Admin can add new users by a form. Informations are required except family member count and second phone number. Admin will decide user name and password so if u forget your password you should contact with admin. Admin can edit user's information. This list will show some of informations. None can see password in this table, admin included. If someone move admin also can delete this user.
